Dr. Tom Kimmerer

“Biomass: Green and Sustainable Energy for Kentucky”

Tom Kimmerer, PhD, is Senior Scientist with Moore Ventures LLC in Lexington Kentucky. Moore Ventures is an engineering firm involved in biomass power projects throughout the US. Tom is a forest scientist specializing in biomass planning, acquisition and logistics for power plants and liquid fuels production.

Tom has a PhD in Forestry and Plant Physiology from the University of Wisconsin-Madison and a B.S. in forest biology from Syracuse. He was a Fulbright Scholar in Malaysia, and has been an advisor to the US Environmental Protection Agency, the USDA, the National Research Council and the government of Malaysia.

Tom was a Professor of forestry, natural resources and plant physiology at the University of Kentucky for 18 years and has been a land management consultant for many years, including extensive experience in Malaysia and Indonesia.
